## **Sustainability Policy**

B&C International is committed to creating a positive impact on the world and promoting sustainable development. To achieve this, B&C International integrates the United Nations' Sustainable Development Goals (SDGs) into all aspects of its operations, from sourcing ingredients to delivering nutritious foods to communities in need.

### ***Sustainable Sourcing***

B&C International sources ingredients from suppliers who adhere to ethical and environmentally responsible practices and prioritize local sources whenever possible. B&C International strives to minimize its environmental impact and promote food security through sustainable agriculture practices.

### ***Reducing Waste***

B&C International implements measures to reduce waste and promote efficient use of resources throughout its operations. This includes reducing food waste, optimizing packaging, and promoting sustainable transportation practices.

### ***Carbon Emission***

Committing to reducing environmental footprint through sustainable practices, including energy efficiency, waste reduction, and the use of renewable resources.

Our goal for sustainability is to align our operations with the United Nations' Sustainable Development Goals (SDGs), particularly SDG 7 (Affordable and Clean Energy), SDG 12 (Responsible Consumption and Production), and SDG 13 (Climate Action).

We prefer using of electric vehicles in our company fleet and we charge our vehicles with the solar energy system installed in our factory.

### ***Renewable Energy***

"Our goal is to utilize sustainable energy sources at our manufacturing facilities, and our initial investment on this commitment is to generate renewable energy through solar panels to be used at our manufacturing facility covering 70% of our installed electricity capacity. This not only helps to reduce our reliance on non-renewable energy sources but also to minimize our carbon footprint, contributing to the fight against climate change."

### ***Supporting Communities***

Partnering with communities and organizations to support local food systems and empower communities to build resilience and self-sufficiency. B&C International is dedicated to promoting education and awareness around healthy and sustainable food practices.

### ***Equal Opportunities***

By developing nutritious food products for women and incorporating a gender-informed approach, B&C International aims to promote gender equality and improve the health and well-being of women worldwide.

### ***Monitoring and Continuous Improvement***

We continuously monitor and evaluate our sustainability practices to ensure that we are meeting goals and making a positive impact. We regularly engage with stakeholders and incorporate feedback to drive ongoing improvement and innovation.

### ***Incorporating the SDGs***

B&C International aligns its sustainability policy with the United Nations' Sustainable Development Goals (SDGs), including:

By integrating these goals into our operations, B&C International strives to create a better future for all and promote sustainable development.
